Building Performance Scorecard

Generated by HPB Pulse on [DD-MM-YYYY]

Project Name
[Placeholder]

Location
[Placeholder]

Built-Up Area
[Placeholder]

HPB Pulse assesses how this project performs against BEE standards, National Building Codes, and ASSURE KPIs. **Results are indicative and not a substitute for design consultancy.**

Performance at a Glance

BEE Star Rating
[Placeholder]
Zero-star energy performance

EPI
[Placeholder]
Within ASSURE KPI ≤75kWh/m^2/year

Net Energy Status
[Placeholder]
Renewables offset x% of consumption

HVAC Capacity Factor
[Placeholder]
More cooling provided than needed

Contract Demand Density
[Placeholder]
Right-sized power capacity

Backup Power Density
[Placeholder]
Right amount of power back-up

Water Efficiency
[Placeholder]
Usage above recommended limit

Better building performance starts with assessment.

HPB Pulse has been developed by the IIHS Sustainable Energy Lab for ASSURE, an initiative to transform India's energy- and carbon-intensive building and real estate sector by promoting High Performance Buildings (HPBs).

ASSURE is anchored by the Indian Institute for Human Settlements (IIHS) and supported by Infosys. To receive no-cost technical assistance for achieving high-performance outcomes in your projects, or to explore opportunities for collaboration, write to **rakhi.sahay@iihs.ac.in.**
